### **GELATO**

Gelato is a frozen dessert that originated in Italy and is known for its intense flavors, artisanal presentation and nutritional value. Ingredients, production, texture, nutrition and less air all set gelato apart from ice cream, making it more satisfying. Natural ingredients include milk or water, sugar, and sometimes fruit. Having fewer calories than ice cream, gelato's dense, creamy texture and variety of flavors can be enjoyed any time of day.

### **SORBETTO**

Sorbetto is an American term for an even healthier version of gelato. Made with water instead of milk, it is fat and dairy-free with fruit-based flavors. In Italy, whether made with water or milk, it is still referred to as gelato.
